

Bio·Lutein

An evidence-based blend providing 20mg of lutein, 2mg of zeaxanthin and 2mg of meso-zeaxanthin per softgel. Supports visual acuity and protects the eyes from the damaging effects of blue light emitted from electronics.

Each softgel contains:

Lutein (from Lutemax 2020™ flower, marigold extract, <i>Tagetes erecta</i>)*	20mg
Zeaxanthin	2mg
Meso-Zeaxanthin	2mg

60 softgels

*Lutemax2020 is a registered trademark of OmniActive Health Technologies Ltd.

GMO, gluten, soy and dairy free.

Approximately half a million Canadians are estimated to be living with significant vision loss that affects their quality of life. Although the most common cause of vision loss is age-related macular degeneration (AMD), a new generation of children and young adults are becoming more and more affected by the high volume of electronic usage in the form of computers, tablets and cell phones. In both circumstances, damage to the central portion of the retina, known as the macula, negatively affects visual acuity and can cause significant eye fatigue.

Fortunately, targeted carotenoids known as lutein, zeaxanthin and meso-zeaxanthin can protect the

macula and eye health as a whole. These compounds are found in various parts of the macula, but lutein is most densely concentrated in the peripheral macula, meso-zeaxanthin in the central macula and zeaxanthin covering the areas in between. Their role is to help to protect the eye from harmful UV lights and they have been demonstrated to reduce the risk, progression and severity of AMD and other visual disturbances such as cataracts.

The problem is that these carotenoids cannot be made by the body and research has shown that almost 70% of adults do not consume the recommended amounts of vegetables, fruits and other

Key points

- Each softgel provides 20mg of lutein, 2mg of zeaxanthin and 2mg of meso-zeaxanthin
- Proven to effectively filter out blue light that is emitted from electronic screens such as cell phones and computers, reducing eye strain and fatigue with prolonged exposure
- Reduces the risk of macular degeneration and improves visual performance markers such as contrast sensitivity, glare and processing speed
- Significantly improves sleep quality and reduces headache frequency in individuals exposed to prolonged screen time

carotenoid sources. This means that supplementation is required in a large proportion of the population.

Few supplements offer complete protection of the retinal tissue with the ideal 10:1:1 ratio of lutein, zeaxanthin and meso-zeaxanthin, respectively. This is the same ratio of carotenoids found in nature, and only this specific ratio has been shown to effectively filter out blue light that is emitted from electronic screens such as cell phones and computers.

Consequently, this 10:1:1 blend has been demonstrated to reduce eye strain and fatigue with prolonged blue light exposure from electronics and also improve visual performance markers such as contrast sensitivity, glare and processing speed. Perhaps

most impressive, research has shown that this blend can significantly improve sleep quality and reduce headache frequency, when compared to placebo, in individuals exposed to prolonged screen time.

Bio·Lutein conveniently provides the evidence-based dosage and ratio of lutein, zeaxanthin and meso-zeaxanthin in just one softgel per day. Moreover, **Bio·Lutein** is readily bioavailable, significantly increasing blood carotenoid levels in just 2 weeks and increasing macular pigment density in only 8 weeks. Lutein, zeaxanthin and meso-zeaxanthin found in **Bio·Lutein** are sustainably sourced from marigold extract and each bottle delivers a two-month supply of 60 softgels.

Non-Medicinal Ingredients: Natural tocopherols, safflower oil, sunflower oil, sunflower lecithin. Capsule: gelatin, glycerin, yellow beeswax, purified water.

Indications: Clinically proven to help improve macular pigment optical density, which helps protect the retina by filtering out damaging blue light. Helps to support eye health in conditions such as cataracts and age-related macular degeneration, and protect the eyes against oxidative damage. Helps improve contrast sensitivity, visual acuity, and glare recovery.

Directions: Adults - Take 1 softgel per day or as directed by a healthcare professional.

Warnings: Do not use if safety seal is broken. Consult a healthcare professional prior to use, especially if you are pregnant or breastfeeding.

Known Adverse Reactions: Do not use if you are allergic to plants of the Asteraceae/Compositae/Daisy family.
